CIA ARCHIVES AND RECORDS CENTER

26 July 1967

MEMORANDUM FOR: CIA Records Administration Officer

SUBJECT : CODIB-D-111/1.7/7 and KY-3 Phone System

The discussion in the subject report concerning the use of the commercial telephone system versus the KY-3 (green) secure voice communications system causes me to wonder if we should have someone look into the possibility of having the KY-3 installed in your office and the [REDACTED] 25X1A6a

The secure system is already located at [REDACTED] in the Commanding Officer's Office and the Emergency Communications Center and could possibly be extended to the [REDACTED] 25X1A6a

I can see where this would not only allow us to discuss more problems over the phone, but by using the Magnafax 840 Facsimile Transceiver, discussed on page three, we could provide fast reference service in an emergency and maybe could eliminate the need for "Special Runs".

I don't know who to contact, but maybe [REDACTED] or someone in Mr. [REDACTED] group would know. 25X1A9a

25X1A9a

[REDACTED] 25X1A9a
Chief
